The following table summarizes the results of the present study. The first column lists the different methods used to estimate the parameters of the model. The second column indicates the number of observations used in each case. The third column shows the estimated values of the parameters, and the fourth column provides the corresponding standard errors. The fifth column gives the value of the Akaike information criterion (AIC) for each method. The last column shows the value of the adjusted R-squared (R^2) for each method.
